INDEX.

A

ABDOMEN, wound of, 250, 414
Aberdeen, University and King's College, pass lists of, 169; and homœopathic graduates, 194, 216
Abortion replaced, Mr. Henning on, 122
Acarus scabiei, discovery of the male, 488
Aconite, tincture of, accidental poisoning by, 56
Adder, bite in the face by, 157; poisoning by, 437
Addison, Dr., cases under the care of, 555
Administration of remedies, Dr. T. Cattell on, 85
Adulteration of pickles, 170
Air-passages, foreign body in the; tracheotomy performed for its removal, 600
Alcohol from sour oranges, 569
Aldis, Mr. C., clinical remarks on a case of asthmatic breathing, 439
Allan, Dr. J., report of a case of popliteal aneurism, 411
Anæmia of infants, extract of bullock's blood in, 579

ANALYTICAL SANITARY COMMISSION.

RECORDS OF THE RESULTS OF MICROSCOPICAL AND CHEMICAL ANALYSES OF THE SOLIDS AND FLUIDS CONSUMED BY ALL CLASSES OF THE PUBLIC (*Illustrated by numerous Engravings*):

Cocoa and its Adulterations:

(Third Report.)—Results of the further examination of numerous samples of flake, rock, granulated, soluble, dietetic, homœopathic, and other cocoas. — Results of the further examination of the various samples of chocolate, 15

Oatmeal, and its Adulterations:

Results of the microscopical examination of various samples of oatmeal, purchased at the establishments of different corn-chandlers and bakers in the metropolis.—Analyses, 42

Tea, and its Adulterations:

Description of the tea-plant.—The different kinds of tea; its manufacture.—The scenting of tea.—Analysis and properties of tea.—On the use and detection of leaves other than those of the tea-plant.—On the re-preparation of exhausted tea-leaves: analyses of samples seized. — On catechu, terra Japonica or Japan earth, in tea.—La Veno Beno, analysis of.—Chinese botanical powder, analysis of.—Sulphate of iron.—Rose pink.—Logwood.—Graphite, plumbago, or black lead.—Talc, china clay, and soapstone.—Engravings showing the structure of the tea-leaf, as well as that of various leaves used in the adulteration of tea, 90

Black Tea, and its Adulterations, (continued):

Indigo.—Turmeric.—Analyses of numerous samples of tea as imported.—Ditto of samples recently seized by the excise.—Ditto of samples purchased in the metropolis. — Important conclusions. — Engravings showing the minute structure of the tea-leaf, &c. &c., 112

Green Tea, and its Adulterations:

Cultivation and manufacture; colour of; adulteration of.—Statements and observations of writers concerning.—Prussian blue, mineral green, verdigris, arsenite of copper, Dutch pink, chromate and bichromate of potash, chrome yellow, chalk, magnesia, French chalk, Chinese tea dyes.—Spurious green teas of British fabrication; analysis of samples of, seized by the excise; ditto of genuine green teas, 136.—Methods to be adopted in order to ascertain whether tea be glazed or not.—Tests for the ingredients employed in the facing of tea.—Analyses of samples as imported from China; ditto of samples of Assam and Java tea; ditto of spurious green tea of British fabrication.—Important conclusions, 161.—Analysis of samples, with the names and addresses of the shops were purchased.—On the adulteration of tea by the Chinese with leaves other than those of the tea-plant. — British tea. — Conclusions from the analyses of samples purchased in the Metropolis.—Recapitulation of the more important results arrived at in the course of the investigations on tea and its adulterations.—Engravings showing the structure of the tea-leaf, as well as of other leaves, discovered in samples of tea as imported, 210

Milk, and its Adulterations:

Composition and analysis of milk; skim-milk, butter-milk, cream, butter, curds-and-whey, cream-cheese, ordinary cheese.—Influence of age on milk.—Influence of food on milk.—Influence of temperature on milk. Influence of the time and frequency of milking. —Table showing the difference in the quality of the first and last milk obtained at each milking.—On the housing of cows.—Method of determining the specific gravity of milk. —Method of determining the cream.—Method of determining fatty matter.—The lactoscope.—Table indicating the richness of different kinds of milk after the degree which they show on the lactoscope.—Engravings: 1, the common hydrometer; 2, lactometer and stand; 3, the lactoscope, 257.—Method of determining the cheese, the butter, the sugar, saline matter, the casein.—Preparation of the test-liquor.—Preparation of whey.—Examination of the whey. — The centesimal galactometer. — Adulteration of milk; adulteration with water, flour, milk of almonds, gum, gum tragacanth, chalk, turmeric, carbonate of soda, sugar, emulsion of hemp-seed, and cerebral matter.—On the effect of storing milk in zinc pans.—Engraving of the centesimal galactometer, 279.—Tables of the specific gravity of pure milk and the per-centage of cream; of the density of serum, and its relation to the specific gravity of milk.—Effects of the addition of different per-centages of water on the serum of milk.—Results of the microscopical and chemical examinations of twenty-six samples of milk purchased in the metropolis.—Engravings of the microscropic appearances of good milk, poor milk, cream, curd, colostrum, and milk adulterated with sheep's brains, 322

Arrow-Root, and its Adulterations:

(Second Report.)—Results of the microscopical examination of thirty-six samples of arrow-root, of different qualities and prices, purchased at different shops in the metropolis.—Arrow-root sent to workhouses.—Conclusions, 352

Bread, and its Adulterations:

(Second Report.)—Results of the chemical and microscopical examinations of twenty-five samples of bread purchased at the establishments of different bakers, whose names and addresses are given. — The League Bread Company. — Table showing the weight of bread as delivered at houses, 398

Chicory and Coffee, with their Adulterations:

Results of the microscopical and chemical examinations of samples of chicory obtained of

different manufacturers, and at the establishments of different grocers in the metropolis. —Likewise examinations of samples of coffee purchased at the establishments of different grocers in the metropolis, 420

The League Bread Company and THE LANCET, 422

Bread, and its Adulterations:
(Supplemental Report.)—Analyses of samples of flour obtained from the League Bread Company, of Mr. Clapperton, and of Messrs. Davies and SON, 445

Isinglass, and its Adulterations:
The fisheries.—Method of preparation—Manufacture of isinglass.—Gelatine, 472.—Further description of isinglass.—Results of the microscopical examination of twenty-eight samples of isinglass, purchased at the establishments of grocers and Italian warehousemen resident in the metropolis.—Conclusions, 510

Analytical Sanitary Commission and the League Bread Company, 446
Anderson's University, regulations of, 328
Aneurism, obliteration of the carotid artery, 6; compression of femoral artery, 83; of the heart, 197; popliteal, treatment of, in Belgium, 320; popliteal, 58; cured by pressure, 411
Ankle-joint, amputation at the, 81, 201, 202, 257, 271
Anti-quackery movement, 382
Aorta, on compression of, in uterine hæmorrhage, 10
Aortic valves, diseased, 496
Apoplexy from a fall, 131
Apothecaries' Hall, pass lists of the, 22, 72, 120, 145, 169, 216, 240, 264, 285, 336, 360, 383, 404, 429, 452, 477, 498, 522, 545, 568, 593, 614; the society of, 145; annual report of court of examiners, 193; regulations of, 290; of Ireland regulations, 332; preliminary examination, 404
Appendix vermiformis, ulceration of the, 287
Appointment of Dr. J. Roberts, 594; of Dr. Maurice Corr, 615
Arabs, medicine among, 374
Arab practitioners, modern, 178
Armitage, Dr. A., the late meeting at Rocs, letter from, 597, 592
Armstrong, Dr. J., on a case of thymic asthma, 28
Army medical service, regulations of, 292
Arsenic, case of poisoning by, 552; death from, 522
Artery popliteal, rupture of, 85
Ashton, Mr. T. H., on a case of extravasation of the urine, 390
Assistants, medical, 262, 335, 357, 404, 451, 476
Associated practitioners of Shropshire, 594
Assurance Office, New Equitable, its principles, and its remarkable success, 376
——— and its supporters, 419
——— and the profession, 566
Asthma thymic, on a case of, 28
Asthmatic breathing, case of, 439
Asylum for the insane of the middle classes 568
Atkinson, Dr. J. C., on the Benevolent Medical College, 144

B.

Babington, Dr., address of, 464; cases under the care of, 431
Balfour, Dr., University of Edinburgh, letter from, 86
Balloon descent at a lunatic asylum, 264
Barber, Mr. C. H., letter from, 499
Barclay, Dr., statistical report on disease of the heart, 34, 492
Barkus, Dr. Benjamin, on a case of calculus of the urethra and prostate gland, 30
Basham, Dr. W. R., on a case of starvation, 602
Bate, Mr. C. S., letter from, on the necessity for a college for dental surgery, 287
Beale, Mr. J., ovariotomy successfully performed, 33
Benevolence, true, 422
Benevolent medical college, 181, 398, 439
Bengal medical college, 216
Beriberi, phosphorus in, 462
Berncastle, Dr. J., on a case of death from rupture of the uterus, 78; on leprosy and elephantiasis in South Africa and India, 267
Bile, as a modifying agent in digestion, its inutility, 177
Bird, Dr. G., remarks on the hydro-electric chain of Dr. Pulvermacher, 388
Birmingham, Queen's college and hospital, 303; distribution of prizes at, 360; fellowships at, 405
Bishop, Mr. E., on a case of hæmorrhage occurring before labour, 528
Bladder, stone in the, 347; lithotomy, sloughing of the rectum, recovery, 581
Blennorrhagia in the female, 229
Blick, Mr. T., district vaccinators, 74
Blood, fibrinous element of, 516; transfusion of, 556
Blood-letting in children, 602
Boards of guardians, want of publicity to the proceedings of, 239
Body, foreign, in the air-passages, case of, 600
Boissonneau's artificial eyes, 130
Bone, internal abscess of, 251
Books received for review, 49, 453, 529, 570
Boulger, Dr. E., anti-quackery movement, 382
Bowman, Mr. W., on a new method of treating certain cases of epiphora, 8
Brain, concussion of, 57, 314
Brakyn, Mr. H. C., on the sounds of the heart, 119
Bree, Mr. appointment as a magistrate, 476
Bristol medical school and St. Peter's hospital, 305
British lying-in hospital, 302; medical fund, 146, 568
Brittain, Mr. T., question of practice, 545
Bronchocele, extirpation of a, by M. Roux, 253
Brookes, Mr., new charter of the college, 545
Brown, Dr. F. J., on the humiliating position of naval surgeons, 119
Brown, Mr., cases under the care of, 173
Bubo, phagedænic, 200
Budd, Dr., cases under the care of, 105
Bullock's semola—its difference from semolina, letter from Mr. Bullock, 44
Bullock's blood, extract of, in the anæmia of infants, 579
Burgess, Dr. J., the policy and pathology of insanity, 176, 246, 389
Burton, Mr. H. R., letter from, on the alleged improved speculum recti, 592
Button scurvy, a case of, 440; Mr. D. Kelly on, 248
Buxton, Mr. T., treatment of diarrhœa and cholera by sulphuric acid, 215, 239

C.

Cæsarian section, 10, 226, 325
Caffre war, the, 457
Calculi extracted from the perinæum, 36
Calculus of urethra, 30
Cambridge University regulations, 287
Campbell, Mr. A., on Woorara poison, 4
Cancer round the anal orifice, 82
Cane, Mr. W. H., epilepsy treated by tracheotomy, 35
Carditis, rheumatic, 313
Carotid artery, tying of, effects, 509; compression of, for relief of pain in the trunk and limbs, 582
Carte, Dr., instrument for compression, 84
Cartwright, Mr. R., observations on the impulse of the heart, 578
Cataract, hard, cases of, 155; operation for, on a bear, 499; structure of, Dr. Lebert on, 604
Catheter, piston-armed, W. T. Iliff, 263
Cattell, Dr. Thos., on the administration of remedial agents in phthisis, 55; a simple process for precipitating the cotton contained in collodion, 506
Chadwick, Dr. S. T., report of a case of severe gun-shot wound, 369
Chancery, court of appeal in, 594
Chapman, Mr. W., uterine hæmorrhage arrested by the injection of cold water, 370
Charing-cross hospital and school, 145, 399; introductory lecture at, 316
Chemistry and its errors, 357, 427
Chest, congenital malformation of, 229
Children, diseases of, remarks on, 505; insidious nature of diseases in, 589; blood-letting in, 600
Chippendale, Mr., on amputation at the ankle-joint, 237; and the Medical Society of London, 519
Chloride of zinc in typhus, 122
Chloroform, death from, 48; in India, 96; for the extraction of teeth, death, 203; new application of the inhalation of, 203
Cholera in Northern Africa, 193; in Africa, 264
Chorea and delirium, sulphates and phosphates excreted in, 9
Chowne, Dr. W. D., the influence of certain diseases on the tone of the mind, 483, 559
Christopher, Mr. J. C., on syphilis, 460
Ciliary process, functions performed by, 77
Circular of the new Protector Life Office, 571
City of Dublin hospital, 332
City of London hospital for diseases of the chest, 302
City Orthopædic Hospital, 615
Clapperton and Davies, Messrs., and analysis of bread, 446
Clark, Mr. A., case of disease of the pancreas and liver, accompanied with fatty discharge from the bowels, 152
Clark, Mr. Le Gros, cases under the care of, 507
Clay-pipe swallowed, and finally ejected per anum, 416
Club, a penny medical, 359; system at Oakhampton, 430
Coathupe, Mr. C. T., epitaph by, 478
Cobb, Dr. cases under the care of, 313
Cocoa and its adulterations, 15
Cock, Mr. cases under the care of, 129, 596
Cod-liver oil and fish oil, comparative value of, 509; fish, poisoning from, 589
Collapse, hot pillows in, 224
Collodion in skin diseases, 10; process for precipitating the cotton from, 506
Colon, obstruction of, 9
Consumptive patients, peculiar appearance of gums of, 35
Cookery, French and English, 194
Cooper, Mr. B., cases under the care of, 57
Cooper, Mr. E., ununited fracture successfully treated, 412
Cooper, the late Mr. T., 476
Copeman, Dr., the Norwich case, 122
Cord, spinal, case of disease of the, by Mr. J. F. Marson, 598
Corpus carvernosum, morbid states of, 481, 573
Corpulence, enormous, 36
Correspondents, notices to, 23, 50, 73, 98, 121, 146, 169, 193, 217, 265, 286, 310, 338, 361, 385, 406, 429, 453, 478, 499, 522, 547, 570, 594, 616
Cotton wool in fractures, 320
Coulson, Mr., cases under the care of, 61
County Court, Brompton, 240; Potteries, 593; Whitechapel, 569
Court of Exchequer—Leete v. the Gresham Life Assurance Society, 46
Courtenay, Mr., letter from, 242
Cox, Dr. W. J., on the Austrian remedy for cholera, 142
Crawford, Mr. J., case of complicated gun-shot wound, 411, 437, 459
Creosote, therapeutic uses of, 393
Criminal lunatics, memorial to Sir George Grey, 167

Crisp, Dr. E., on the legal right to practise as a physician in England, 476
Critchett, Mr., cases under the care of, 386
Croup, case of, 347
"Curious case," Mr. Muggeridge, 24
Curling, Mr., cases under the care of, 33, 252, 529
Cutler, Mr., cases under the care of, 250

D

Dalton, Mr. W., on the use of the long forceps in labour, 459
Davies, Dr. Henry, on blood-letting in children, 602
Deaf and dumb in London, convention of the teachers of, 98
Degeneration of the placenta, letter from Dr. Ranking, 287
Dendy, Mr. W., on a point of uterine pathology, 103; letter on medical nomenclature, 454; on the insidious nature of disease in children, 589.
Dental surgery, necessity for a college of, 263
Dermott, Mr. H., case of poisoning by arsenic, and recovery, 552
Deserters, marking of, 264, 309
Destruction of the dental pulp, 24
Diarrhœa, treatment of, by sulphuric acid, 334, 359, 382
Dick, Dr. R., alphabetical notices of subjects connected with the treatment of dyspepsia, 102, 224
Dixon, Mr. J., on a case of large hydatid cyst at the root of the neck, 34
"Doctor," the title of, 287, 500
Doman, Mr. E. W., effects of morphine in hernia, 249
Donation by Dr. Silver to the new Medical College, 593
Douglas, Sir Howard, and Sir De Lacy Evans, testimonials to, 213
Dublin School of Medicine, regulations of, 332
Duffin, Dr., reply to Dr. Simpson, 356, 402
Dura mater, periosteal disease of, 149, 174, 247, 575
Dysentery at Nantes, 488
Dyspepsia, subjects connected with, 224; treat-of, 102

E

Ear, some observations on diseases of, 8
Early viability, 177
East India Medical Service, regulations of 292
Ectrophia vesicæ, 370
Eczema, oil of pitch in, 556
Edinburgh, opening of the medical session in the university of, 517; Royal Medical Society of, 546; Royal College of Surgeons of, liberality of the, 310; University and Homœopathy, 451
Edmonds, Mr. J., on a case of button-scurvy, 440
Edwards, Dr. S., on a case of true aneurism of the heart, 197
Egypt, medical periodicals in, 337
Electricity recommended for arresting the fatal effects of ether and chloroform, 509
Elytrocele, impeding delivery, on a case of, 577
Encephaloid growth, recurrence of, 456; tumour in the popliteal space, 171
English physicians in France, 22, 72, 592.
English surgeons and French medical societies, 522
English medical works, 462
Epidemiological Society, 35, 48, 146, 240, 429, 452, 522, 546
Epilepsy treated by tracheotomy, 33; and quinine, on, by Dr. W. G. Maxwell, 603
Epilectic mania, 372; patients, prizes to, 429
Epiphora, new method of treating, 8
Epitaph on a hydropathic patient, 478
Equitable Assurance Office, New, its principles and its remarkable success, 376
——— and its supporters, 419
——— and the profession, 566
Ergot of rye in paraplegia, 509
Erichsen, Mr., cases under the care of, 31, 414
Europeans, disorders of, on return from tropical climates, 54, 79
Evans, Mr. H. B., on a new and simple method for the cure of fistula, 343
Evans and Co., Messrs., on the speculum recti, 592
Eye, inflammation and suppuration of, 128; artificial, Boisonneau's, 130; complete evulsion of, 556
Eyre, Sir James, appointment of, 498
Exostosis, cases of, 529

F

Faculty of Physicians, Glasgow, regulations of, 329; of Medicine, Oxford, 359
False aneurism of the brachial artery cured by galvano-puncture, 177
Fallopian tubes, catheterism of, 228
Fatty degeneration of the voluntary muscles, 588
Fear, a therapeutic agent, 428
Fees to medical witnesses, Mr. T. Webb on, 169
Feigned sickness, an extraordinary case of, 594
Femur, dislocation of, 108, 347; dislocated, reduction of, 514
Fergusson, Professor, portrait and biography of, 74; cases under the care of, 6, 81, 130, 311, 579
Fever, sleeping, 509
Ffolliott, Mr. F., appointment of, 569
Fish oil in rickets, 346
Fistula, new cure for, 343
Fletcher, Dr., case of organized polypus of the heart, 35; Mr., case of rupture of the popliteal artery, 85, 167
Ford, Mr., uterine disease, under whose care to be placed? 50
Forder, Mr. Jas., vaccination and small-pox, 45
Forearm, foreign body in, 311
Forster, Mr. J. C., the treatment of hip-joint disease with the straight splint, 503; Mr., cases under the care of, 581
Fothergillian medal, 42; Mr. Nunneley and the, 595
Fox, Mr. O., the Medical Benevolent College, 488
Fracture, ununited, treated by ivory pegs, 344; successfully treated, 412
France, accusation of mala-praxis in, 604
France, Mr. J. F., letter on Guy's Hospital Reports, 478
Fraser, Mr. Wm., on the emergence from the surface of the body of pins or needles, 57
French honour, 522
Fullerian Professor of Theology at the Royal Institution, 48

G

Galvanism, cutaneous and muscular, 240
Garlick, Mr. F. S., grievances of poor-law medical officers, 565
Garman, Mr. H. V., medical practitioners and Morison's pills, 430
Garrett, Mr. C. B., on homœopathy, 122
"Garrison" coffee, 616
Gay, Mr., cases under the care of, 312, 530
Generation of water in diabetes, 416
George, Mr., cases under the care of, 171; Mr. Durancé, death of—short memoir of, 570
German Hospital, 302
Glanders in the human subject, 103
Gleet, tannate of alumina in, 494
Globulistic graduate of Aberdeen, letter from Dr. Fyfe, 217
Gloucester County Lunatic Asylum, 429
Gloucestershire Medical Association, 181, 395
Goolden, Dr. R. H., periosteal disease affecting the dura mater, 149, 174, 247, 575
Gore, Mr., cases under the care of, 173
Gorini, Professor, 406
Grant of her Majesty to the wife of the late Dr. David D. Davis, 545
"Grease" and cow-pock, 168
Grease, inoculation of, 129
Gregory, Dr., and his patient, 118, 133
Gresham Assurance Office, Leete against, 46; and the late trial, 71
Gun-shot wound, 369, 411, 437, 451
Gunning, Mr. H., letter from, on the club system at Oakhampton, 480
Guy's Hospital reports, letter from Mr. J. F. France, 478; Hospital School, 274; introductory lecture at, 317

Herapath, Mr. W., on the Austrian remedy for cholera, 120
Hernia, obturator, operated on, 8; of the iris, 131; strangulated inguinal, 269, 455; femoral, 342, 347; two cases of strangulated, 436; inguinal, reduction of, 509; umbilical, in an adult, 33; ventral, from a wound, 153; effects of morphine in, 249; strangulated, reduced during vomiting, 604
Hewett, Mr. P., cases under the care of, 456
Highly, Messrs. *versus* quack publications, 429
Hill, Mr. Gardiner, the Surrey County Lunatic Asylum, letter from, 86
Hilton, Mr., cases under the care of, 345
Hip-joint disease, straight splint in, 503
Holt, Mr. B., cases under the care of, 59, 106, 486, 580, 581

Homœopathic and mesmeric humbug, letter from Mr. Courtenay, 242; doses, letter on, 338; remedy for dislocation, 241
Homœopathic quackery, 284; quacks, Dr. Holland and the, 498, 520
Homœopaths, a consulter with, 310.
Homœopathy, 215; at Brighton, 41; at Sidmouth, 69; repudiated in Guernsey, 284; and legitimate medicine, 377; and the Royal Medico Chirurgical Society, 360; at Leicester, Dr. Hawkins' letter, 402; and the Sheffield Infirmary, 475; in Edinburgh, 522, 571; Mr. Garrett on, 122.
Horse-guards circular, memorandum of, 264
Hospital, for consumption, 302; for consumption, near Birmingham, 522; changed into a barracks, 522; for women, medical charities, 338; for skin diseases, 338; Free Cancer, 593; St. Thomas's, distribution of prizes at, 120; for sick children in London, 153; staff appointments, 384.

HOSPITAL REPORTS.

Civil Hospital, Gibraltar.—Case of lithotomy; case of lithotrity, 36.
Queen's Hospital, Birmingham.—Cases extracted from the clinical records of W. J. Moore, Esq.; pneumonia, terminating in recovery, 62
Liverpool Infirmary.—Rupture of the popliteal artery, &c., 85
Dorset County Hospital.—Case of Dislocation of the Femur on the os pubis, reduced after a period of nearly eight weeks, 108
Staffordshire General Infirmary.—Apoplexy and rupture of the spinal cord from a fall; paralysis of the trunk and members (*with engravings*), 131
General Hospital, Birmingham.—Bite of the face by the common adder, followed by vomiting, diarrhœa, and extreme general prostration; reaction induced by large doses of ammonia and brandy; diffuse cellular inflammation; recovery, 157
Liverpool Infirmary.—Rapidly-formed abscess in the psoas muscle; pleurisy; death and necropsy, 203
Charing-Cross Hospital.—Congenital malformation of the chest, 229
West Cumberland Infirmary, Whitehaven.—Clinical reports from the fever wards, by T. F. P'Anson, Esq., 274
King's College Hospital.—Stone in the bladder; dislocation of the head of the femur on the dorsum ilii; femoral hernia, 347
Newcastle-upon-Tyne Infirmary.—Cases operated on by Sir John Fife: case of lithotomy; malignant tumour of the heel; an un-united fracture of the femur, 604

Hovell, Mr. D. de Berdt, on a case of aneurism of the femoral artery, 30
Hue, Dr., cases under the care of, 128
Hull and East Riding School of Medicine, 306
Human body, development of, 594.
Humerus, comminuted fracture of, 59; dislocation of, 32
Hunt, Mr. T., case of Mr. Sylvester, 264; statistical science applied to epidemics, 35; the skin, as a diagnostic of the general health, 424
Hunterian Museum, 96, 98
Hunterian School, 301; introductory lecture at, 317
Hydatid cyst at the root of the neck, 34; growth, extraction from the abdomen, iodine injections, 583
Hydrargyri quinæque chloridum, the dose of, 170, 218
Hydrocele, cases of, 367
Hydrocephalus, congenital with spina bifida, 57
Hydro-electric chain, 388
Hypertrophy of the mammæ, 36; of vesical glands, 373
Hysterical imitations, 416; paralysis, 198

I

Ikin, J. Ingham, Esq., on concussion of the brain, 314
Inland vales, for invalids, 383
Insanity, feigned, 121; policy and pathology of, 176, 246, 389
Inspectors of medical charities, 615
Instruments, Mr. T. Wakley's new stricture, 20
Interments in vaults, effects of, 125
Intermittent fever, new remedy for, 440; hydrochlorate of ammonia in, 486
Interview of the President and Vice-President of the Royal College of Surgeons with the Secretary of State, 545
Intestinal obstruction, 128.
Introductory lectures, letter on, 453
Intussusception through the ilio-cæcal valve, 586
Iodine injections into the knee-joint, 272; rendered soluble, 556
Ireland, medical commission for, 509; medical pluralities in, 547
Irish census returns taken in the years 1841 and 1851, abstract of the, 97; medical inspectors, 593; poor law medical officers, 593
Irons, Dr. Isaac, on obstetric quackery in Edinburgh, 284; Dr. Simpson's reply to, 333; in reply to Dr. Simpson, 355
Islington Medical Conversational Society, 521
Itch cured in two hours, 583

J

Jackson, Mr. T. C., on Mr. Fletcher's case of rupture of the popliteal artery, 118
Jaws and teeth, differences in development of, 127
Jaw, lower, anchylosis of, remedied, 222
Jervis-street Hospital, Dublin, regulations, 332
Johnson, Mr. H. C., cases under the care of, 385; Mr. H. J., on chronic inflammation and other morbid states, of the corpus cavernosum, 481, 573
Johnston, Mr. David, on a case of foreign body in the air-passages; tracheotomy performed for its removal, 600
Joints, treatment of diseased, 494
Jones, Dr. H. Bence, on the variations of the sulphates and phosphates, 9; on alkalescence of the urine in certain cases, 587; Mr., cases at the Medico-Chirurgical Society, 586
Junod, Dr., exhausting apparatus, 38, 99

K.

Kelly, Mr. D., on the pathology of button scurvy, 248
Kent Ophthalmic Hospital, 362
Kidd, the late Dr., 286
Kidneys, diseased, a case of, 104; hypertrophy of the, 540
King's College Hospital and School, 296; introductory lecture at, 318; and Queen's College of Physicians in Ireland, 331; College, London, scholarships, 499
Knee-joint, case of injury to, 507; two cases of injury to the, 580; incised wound of the, 581
Kossuth and Sir Jas. Clark, 452; letter to Dr. Glück, 500

L

Labour, complicated, 61; use of long forceps and chloroform in, 459, 521; complicated with tumour, 553; successful case of the induction of premature, 582
Lambert, Mr. G., poisoning by the bite of an adder, 437
Lambton, Mr., Shaksperian reading, 498, 546; letter on the Medical Benevolent College, 453
The Lancet, the Provincial Association, and homœopathy, 215
Laryngismus and its different kinds, 526
Larynx, application of nitrate of silver to, 368
Laurence, Mr. P., on a case of tetanus, 342
Lawrence, Mr. A. S., on the incision of stricture of the urethra, 96; cases under the care of, 58
Lea and Perrins, Messrs., and the Ross dispensary, 544
Lebert, Dr., on the structure of cataract, 604

LEADING ARTICLES:

The peculiar position of the Senate of the University of London and the graduates, 12; repudiation of the fraud homœopathy in Scotland—the immoral fooleries of mesmerism, 13; short-sighted policy of the non-paying Life Offices, 14; prison discipline—effects of civilization and education upon crime and criminals, 14; a paltry board of guardians, and their conduct to a surgeon, 15; the Gresham Life Assurance Company and one of their unfortunate assurers, 39; tobacco-smoking—its increase, and the evils attendant upon it, 40; the Royal College of Surgeons of England and homœopathic candidates for its diploma, 41; the non-paying system of assurance offices—evils and dangers of it to persons intending to assure, 41; the helpless, dependent, and unstable position of the University of London, 64; the abettors of mesmerism—the lies of mesmerists, 65; strange evidence of Mr. Brande respecting the condition of the Thames water, 66; what is to be done with the crystal palace? 67; the Edinburgh College of Physicians and Dr. Henderson, 68; deficiency of the statistics of the London hospitals, 68; the Pharmacy Bill, 69; a miserable defender of Dr. Henderson and the humbug homœopathy, 87; why should Englishmen resort to foreign climates for the benefit of their health?—popular fallacies respecting climate, 88; serious schism in the Newcastle School of Medicine, 89; melancholy termination of the Norwich case, 89; the nineteenth anniversary of the Provincial Medical and Surgical Association, 89; painful illustrations of the folly and knavery of homœopathy, 109; reform of the Lunacy Acts — association of medical officers of hospitals for the insane, 110; the fate of homœopathy in the country, 110; the lord chancellor on the evidence of medical practitioners in cases of lunacy, 111; the contest for the office of coroner in Hertfordshire, 111; strange proceedings of some of the members of the council of the Gloucestershire Medical Association, 112; the impostures and idiocies of homœopathy—a homœopathic legitimate, 134; Dr. Gregory, of Edinburgh, and his mesmeric patients, 134; impostors and imposture—globulism and its abettors, 135; meeting of the Provincial Medical and Surgical Association at Brighton, 135; the medical profession a republic, and independent of colleges, 158; necessity for improvements in English cookery, 159; Dr. Cormack and our relations with homœopathy, 160; biographies of naval and military surgeons, 160; the president of the College of Surgeons and the fraud of globulism, 160; meritorious proceeding of University College Medical Society, 161; reprehensible conduct of the Senatus Academicus of the University of Edinburgh, 189; Dr. Henderson's miserable and quibbling defence, 190; anniversary meeting of the Provincial Medical and Sur-

gical Association, 191; the Provincial Medical and Surgical Association and the globulistic quackery, 207; naval and military medical officers—their valuable labours and their niggardly rewards, 208; the roguery and deceit of homœopathic practitioners, 208; the late trial of a Coffinite quack—Mr. Justice Wightman's philosophy, 209; testimonials to the friends in parliament of naval and military surgeons, 209; homœopathic practitioners and the medical societies, 209; the new charter of the Royal College of Surgeons and the punishment of quackery, 231; the wretched and unsatisfactory condition of criminal lunatics, 231; the real abettors of quackery not the really eminent in the profession—globulism and the colleges, 232; vegetarian nonsense and absurdity, 233; the University of Edinburgh and its homœopathic and mesmeric professors, 254; the proposed Medical College; its advantages, and the way to obtain them, 255; the Medico-Ethical Association of Manchester and quackery, 256; the impotent rage of the globulistic quacks, 256; obstetric quackery: its influence on practice and morality, 277; the Hospital for Skin Diseases: its utter uselessness as a place of instruction, 277; the monstrous order from the "Horse Guards" respecting the branding of deserters, 278; suppression of quackery in Guernsey, 278; address to students of medicine on the commencement of their studies, 307; the war against quackery, 326; resolutions of the Medical Society of London against countenancing homœopathy and its practitioners, 326; the mesmeric and homœopathic professors of Edinburgh and the students of medicine, 349; the anomalous position of the Epidemiological Society: its state and prospects, 349; other disgusting quackeries besides homœopathy require rooting out, 350; another pervert to homœopathy, 351; the order for branding deserters rescinded, 351; movement in the medical societies against fraudulent quacks, 351; the preliminary examination in classics at Apothecaries' Hall, 352; the hospitals of London and the Great Exhibition, 352; globulistic pretensions at Leicester—Sir Henry Halford, Dr. Francis Hawkins, and quackery, 376; the new Equitable Life Assurance Company: its principles and its remarkable success, 376; the importance and success of the Pathological Society, 377; the Colleges of Physicians and Surgeons and homœopathic fraud and humbug, 377; the alarm of the globulist quacks at the position taken against them, 396; the voluntary examination in classics and mathematics, at Apothecaries Hall, 396; resolutions on quackery by the London and Provincial Medical Protection Society, 397; Dr. George Calvert Holland and his position at Sheffield, 397; spirited appeal of the candidates for the degrees at St. Andrew's, 397; the *British and Foreign Medico-Chirurgical Review* and its support of quackery, 418; importance of life assurance: the New Equitable Company and its supporters, 419; the University of Edinburgh and the students of medicine, 420; the late meeting at Leamington to support the New Medical College, 420; unholy alliances in quackery: mesmerism and its abettors, 444; the topography and medical statistics of India:—Mr. Bedford's suggestions, 444; the case of Woolcott *v.* Grover: the abuses of medical charities, 445; spirited letter of Dr. J. C. Hall to the Council of the College of Surgeons, 445; globulism in difficulties—the homœopaths caught in their own trap—the "New Magnetic Indicator" of folly and credulity, 466; the New Medical College—proposed publication of the list of subscribers, 472; the Medical School and the students of Edinburgh, 489; report of the Lunatic Asylum at Bedford—economy and humanity, 489; state and prospects of the Medical Society of London, 490; the Sheffield Infirmary and its homœopathic physician, 491; primopathy—the new quackery, 491; homœopathy and the Medico-Chirurgical Society of Edinburgh, 492; the first list of subscribers to the New Medical College, 512; the Epidemiological Society and its questions respecting small-pox, 512; the new charter of the College of Surgeons, 513; the Ross Dispensary and homœopathic humbug, 513; chloroform and infinitesimal doses, 514; Dr. Holland and the globulistic practitioner at Norwich, 514; the draft of the new charter of the Royal College of Surgeons of England, 532; medical witnesses and lawyers, 533; The College of Surgeons and its indirect support of quackery, 533; the globulistic professor of Edinburgh and Mr. Syme's letter, 559; the new charter of the College of Surgeons, 559; election of librarian to the Radcliffe Library at Oxford, 560; the University of Dublin and diplomas in surgery, 560; memorial of Mr. Syme to the town council of Edinburgh, 560; the health and mortality of London during the last six months, 584; the true security of life assurance offices dependent on medical reports, 585; orthodox physicians and quacks, 585; quack pills protected by law, 586; the town council of Edinburgh and homœopathy, 608; the health and mortality of London during the past six months, 608; the Royal College of Physicians and quackery, 609; claims of army and navy surgeons, 609

LECTURES:

HAWKINS, MR. CÆSAR:

Clinical Lecture delivered at St. George's Hospital:

Secondary abscesses of joints and other parts following parturition.—2. Primary abscess in the iliac fossa following parturition; fæcal abscess.—3. Artificial anus after injury; chronic and acute.—4. Collections of fæces and abscess after ulceration of colon and cæcum.—5. Discharge of fæces with urine.—6. Calculus in kidney resembling fæces in the cæcum.—7. Kidney resembling tumour of liver, with fæcal abscess, 25;—1. Acute synovitis of knee and abscess, from needle.—2. Crepitating synovitis of knee.—3. Gonorrhœal synovitis of joints, and ophthalmia.—4. Rheumatic synovitis; ulceration of cartilages; extension by screw.—5. Synovitis with scrofula.—6. Scrofulous abscess of knee; cure.—7. Diseaseof knee; amputation.—8 and 9. Chronic inflammation of ligaments of the knee.—10. Hysterical pain of knee, 147

MACKMURDO, MR.:

Notes from a Course of Lectures, delivered at St. Thomas's Hospital:

Lecture XVII.—The diseases of the secreting and excreting lacrymal organs and of the conjunctiva oculi. Remarks on the existence of entozoa in the anterior chamof the human eye, 219

Lecture XVIII.—Diseases of the eyelids and adjacent parts, 363

PEACOCK, DR. THOMAS:

Clinical Lecture on Acute Capillary Bronchitis, delivered at St. Thomas's Hospital, 75, 123

SMITH, MR. S.:

Clinical Lectures on Internal Derangement of the Knee-Joint, 265

THOMPSON, DR. THEOPHILUS:

Clinical Lectures on Diseases of the Chest, delivered at the Hospital for Consumption and Diseases of the Chest:

Lecture I.—Importance of general symptoms. Physical signs. Hooke, in the seventeenth century, the proposer of auscultation. Laennec. Importance of visible signs. Hydatids expectorated. Cracked-pipkin sound. Modifications of movement of chest by phthisis. Pleurisy. Emphysema Causes and treatment of asthma, 1.

Lecture II.—Further illustrations of cracked-metal sound. Gangrene of hand. Obstruction of arteries by coagula. Hæmoptysis: its relation to consumption; causes, tendencies, and treatment, 51

Lecture III.—Expectoration as a means of diagnosis; its varieties in different conditions and periods of consumption; 1st, salivary; 2nd, mucous; 3rd, flocculent; 4th, purulent. Proportion of saline matter. Changes indicative of amelioration. Bronchial polypi. Expectoration of confervæ. Vegetable parasites in animal structures, 99.

Lecture IV.—The pulse: general remarks on the causes of its modifications; average frequency in health; morning and evening pulse. Acceleration in consumption. Effect of posture in health contrasted with effect in disease. Practical illustrations. Speculations regarding the cause, 195.

Lecture V.—Cod-liver oil: superiority to any other single remedy in phthisis. Illustrative instances of its value. Different kinds compared. Collateral remedies sometimes useful, often unnecessary. Effect of its introduction into the system by friction. Mode of action. Important practical generalizations derivable from a knowledge of its mode of action. The appreciation and use of facts, 243

Lecture VI.—Substitutes for cod-liver oil Inquiry regarding the relative value of different elements of the oil—carbon, bile, olein. Vegetable oils. Medical use of cold-blooded animals—turtle, viper. Animal oils. Instances of good effects from neat's-foot oil. Sperm oil. Lard oils. Advantage of adding phosphorus to vegetable oil. The long-continued use of oil often necessary to successful treatment, 399

Lecture VII.—Urine. Importance of the office of the kidneys. Œdema of lungs from albuminuria. Renal disease rare in consumptive patients. Altered proportions of uric acid to urea in phthisis. Probable cause and remedy. Proportion of solid contents as influenced by the disease and the treatment. Conditions of the urine as an aid to diagnosis, 407

Lecture VIII.—Early signs of consumption. Prolonged expiratory murmur. Mode of determining its degree. Causes; relation to phthisis. Illustrative cases. Cough. Fistula in ano as affecting the course of consumption. Diarrhœa. Causes and treatment; charcoal; sulphate of copper; acetate of lead; nitrate of silver; bismuth, &c., 479

Lecture IX.—Interrupted, jerking, or wavy. Varieties, and their causes. Examples. Probable relation of the sign to a deposit in the lungs, not necessarily tubercular. Indications afforded by the spirometer. Variations of weight in reference to the progress of consumption, 501

Lecture X.—Appearance of the gums in consumption. The border streaked—margined—pearly—thickened; often changed at an early period of the disease; influenced by habits, &c. Clubbed fingers. Indigestion modified by consumption. Theories of the origin of the gingival margin. Use in diagnosis and prognosis, 523

Lecture XI.—Causes of consumption.—1. Hereditary tendency; influence of this

cause as modified by sex, &c.—2. Bad air.—3. Dissipation.—4. Mental depression. Effects of climate. Value of the "respirator." Importance of muscular exercise. Moral causes of disease under our control, 547

Lecture XII.—Incidental distressing symptoms of phthisis. Night perspirations. Cough. Results of consumption; apparent cure; contraction of cavities. Unfavourable cases; acute phthisis; progress of decay; phosphatic concretions in choroid plexuses; mental condition of the dying, conclusion, 571

Leachman, Mr., on destruction of dental pulp, 24
League Bread Company and THE LANCET, 422; letter from Messrs. Hodson and Burton on, 446; declaration of workmen and agents of, 447
Lee, Dr. R., history of a case of congenital ovarian tumour, with cysts, fatty matter, hair, and bone, in which ovariotomy was proposed, 173; neuralgia of the uterus, 400
Lee, Mr. H., cases under the care of, 251
Leeds School of Medicine, 303
Legacy, munificent, 286
Leg, injury to — question of practice, 449, 545
Lemon-juice in acute rheumatism, 421
Lepra and psoriasis, mineral baths in, 171
Leprosy and elephantiasis in India, 267
Leroy d'Etiolles and the Academy of Medicine of Paris, 61; twisted and bent bougies, 229
Lettsomian professors, 375
Lever, Dr., testimonial to, 474
Levison, Mr. J. L., nature's chemistry inexplicable 224; on the difference in the development of the jaws and teeth in semi-barbarous races of men, and of those in a high state of civilization, 127; letter from, 362
Lewis, Dr. Waller, on the chemical and general effects of the practice of interment in vaults and catacombs, 125
Liberality to the profession, 546
Liebig, visit to England, 121, 193
Lima, medical institutions at, 216
Lindoe, Dr., cases under the care of, 171
Lithotomy, case of, 37; case of, sloughing of the rectum, recovery, 581; in a child, 60
Lithotrity, case of, 37, 106
Little, Dr., partial anchylosis of the lower jaw remedied by division of the masseter muscles, 222
Liver, abscess of, 535
Liverpool Infirmary, 304; College of Chemistry, 304; Northern Dispensary, 315
Lloyd, Mr. cases under the care of, 104, 370, 436
London and Provincial Medical Directory, 406
London Hospital and School, 295; introductory lecture at, 318
London Hospital, election of Dr. Pereira, 383
Lowther, Mr. G., on medical nomenclature, 488
Lucifer matches, necrosis from, 406
Luke, Mr., cases under the care of, 387; Mr. J., case of obstruction of the colon, 9, 597
Lunacy, the law of, 97
Lunatics, criminal, memorial to Sir George Grey, 167
Lupus, 225
Luxation of the crystalline lens, 156; of the vertebræ reduced under chloroform, 156
Luxton, Mr. W., necrosis of the tibia, 391
Lying-in Hospital of the Faculty at Paris, 229
Lynch, Mr. J. C., a case of pregnancy complicated with tumour; premature labour induced, 553

M

Macdonald, Dr., and the University of St. Andrew's, 426; and the late protest at St. Andrew's, 498; answer to an "English Physician," 338
Mackinder, Mr. D., more wonders in medicine, 71
Madness caused by cold, 593
Magnesia an antidote of salts of copper, 416
Magnetic indicator of folly, 466, 475, 497, 520

MEDICAL SOCIETIES:

EPIDEMIOLOGICAL SOCIETY—The uses and limits of statistical science as applied to the study of epidemics, 35, 48, 146, 240, 429, 522, 546; Dr. Babington's address, 464

THE HARVEIAN SOCIETY—Dr. Chowne's opening address, 354, 405

MEDICAL SOCIETY OF LONDON—Commencement of the session; novel operation for a diseased joint; removal of the os calcis; remarkable specimen of aneurism of the arch of the aorta; homœopathic quackery: Dr. Murphy's defence; duration of pregnancy, 378; on the therapeutic uses of creosote; gelatinous polypus; the affinities and prophylaxis of variola, 393; discussion on Mr. Dendy's paper on the affinities and prophylaxis of variola; sporules of small-pox; Perkins's metallic tractors; epidemic small-pox; the skin as a diagnostic of the general health, 423; tannate of alumina in gleet; treatment of diseased joints by incisions, 494; tambac a therapeutic agent; closure of the fissures in the bony palate; reduction of a dislocated femur; inflammation and ulceration of the rectum; improved speculum recti (with engravings); the fibrinous element of the blood in relation to disease, 514; hypertrophy of the kidneys; the treatment of rheumatic pericarditis, 540; removal of a large tumour from the neck; composition of urinary calculi; rupture of the perinæum and its treatment, 561; insidious nature of disease in children; poisoning from cod-fish, 589; external division of stricture of the urethra; galvanic battery and belt; calcification of fibrous tumour of the uterus, 610

ROYAL MEDICAL AND CHIRURGICAL SOCIETY—On some secondary physiological effects produced by atmospheric electricity; on a new method of treating certain cases of epiphora; description of an operation for the radical cure of obstinate stricture of the urethra; case of obturator or thyroidal hernia successfully relieved by operation; some observations on the pathology of those affections of the ear which produce disease in the brain; a case of obstruction of the colon relieved by an operation performed at the groin; abstract of a paper on the variations of the sulphates and phosphates excreted in acute chorea, delirium tremens, and inflammation of the brain, 7 case of ovariotomy successfully performed; account of a case in which a large cyst, containing hydatids, was developed at the root of the neck; death from rupture of the left subclavian artery; a statistical report upon disease of the heart, derived from a consideration of all the cases admitted into St. George's Hospital during the last two years; case of epilepsy treated by tracheotomy; case of organized polypus of the heart; peculiar appearance observed in the gums of consumptive patients, 33; statistical report upon cases of disease of the heart occurring in St. George's Hospital, especially in relation to rheumatism and albuminaria, 492; a successful case of parturition in a patient who had previously undergone ovariotomy by a large incision; on the diagnosis and treatment of ovarian disease, with the history of one hundred and fifty-six cases, 556; a case in which a communication appears to have existed for several months between the stomach and transverse colon, in a child five years old; a case of intussusception through the ilio-cæcal valve; on alkalescence of the urine from fixed alkali in some cases of diseases of the stomach; on fatty degeneration of the voluntary muscles, 586

PATHOLOGICAL SOCIETY OF LONDON—Diamond-shaped head from compression at birth; disease of the urinary organs; stone in the kidney; a remarkable cyst in the omentum; laceration of the right lateral sinus, with extensive extravasation of blood between the bone and the dura mater; obstructive disease of the aortic valves, dependent on malformation; small aneurism in the ventricular septum; obstructive and regurgitant disease of the aortic orifice, 447; sections of two large masses of hair and string; fibrous degeneration of, and deposits in, the substance of the heart, 464; diseased and malformed aortic valves; malformations of the semi-lunar valves (with illustrations), 496; cancer of the lungs, pleura, pericardium, bronchial and other glands; fatty degeneration of the heart, causing death by rupture; case of a portion of the rectum which had been protruded and cut off; specimens of the Guinea-worm; dysentery with extensive sloughing and ulceration of the large intestines, 611

Medicim mechanica, 315
Medulla oblongata, vital spot of, 509
Melanosis of the eye, 386
Memorials of the medical and surgical practitioners of Shropshire and North Wales to Lord John Russell and Sir George Grey, Bart., 613
Menstruation, vicarious, 531

Mental aberration, influence of, disease in, 483, 550
Merriman, Dr., replacing a partially aborted fœtus, 206
Meryon, Dr., on fatty degeneration of voluntary muscles, 583
Mesmeric exhibition at Hungerford Hall, 383
Middlesex Hospital and School, 298; abstract of introductory lecture, 380
Milk, and its adulterations, 257
Mitchener, Mr. J., letter from, 430

MIRROR OF THE PRACTICE OF MEDICINE AND SURGERY IN THE HOSPITALS OF LONDON:

BATH INFIRMARY—Cases of lepra and psoriasis successfully treated by the thermal mineral baths, 171

BATH UNITED HOSPITAL—Surgical cases, 173

CHARING CROSS HOSPITAL—Excision of the ankle-joint, 271

GUY'S HOSPITAL—Concussion of the brain; loss of memory; ultimate recovery, 57; morbid inoculation from the affection of the horse called "grease," 129; Cæsarian section—mother and child saved, 226; calculi in the perinæum; operation, 345; cases of acute rheumatism cured by lemon-juice, 431; abscess of the liver connected with dysentery; death; autopsy, 555; popliteal aneurism; compression; deligation of the artery; death; autopsy, 596

KING'S COLLEGE HOSPITAL—Aneurism on the common carotid artery; deligation of the vessel; death, 6; amputation at the ankle-joint, 81; ovarian tumour; puncture of the cyst; death, 105; disease of the sacro-iliac synchondrosis; death. Demonstration of the mechanism of M. Boissonneau's new kind of artificial eyes, 130; internal abscess of bone, 251; prolapsus of the rectum, and operation; unsuspected foreign body in the forearm, 311; epileptic mania, 372; puerperal peritonitis; perforation of the colon; death; autopsy, 506; compound fracture of the thigh; severe injury; recovery; treatment of varicose veins by needles and sutures; tumour of the neck 579

LONDON OPHTHALMIC HOSPITAL, MOORFIELDS—Cases of hard cataract; extractions, 155

LONDON HOSPITAL—Umbilical hernia in an adult, 33; popliteal aneurism; compression of the femoral artery; recovery (with an engraving), 83; Cases of amputation at the ankle joint, 201; extraordinary impaction of the head of a large screw into the wrist joint (with an engraving), 252; acute rheumatism; rheumatic carditis; apparent metastasis to the brain, 313; ulceration and perforation of the appendix vermiformis; peritonitis; death, 387; cases of exostosis, 529; cystic medullary disease of bone, vel osteocephaloma, 597

MIDDLESEX HOSPITAL—Ventral hernia supervening on a wound of the abdomen, received many years previously, 153; lupus, 225

REVIEWS AND NOTICES OF BOOKS:

The gold, its alloys, and other metals, used by dentists. By James Robinson, Esq., 37; Lectures on the German mineral waters, and on their rational employment for the cure of certain chronic diseases. By Sigismund Sutro, M.D., 37; Outlines of physiology, anatomy, and surgery. By Wm. Wilkinson, Esq., 37; Surgical anatomy of the arteries, and descriptive anatomy of the heart. By the late Valentine Flood, M.D., 37; Sunninghill Wells: or, a practical inquiry into the action of iron as a constituent of the blood in health and disease, in connexion with chalybeate springs. By Henry Holmes, M.D., 37; Notices of the meetings of members of the Royal Institution of Great Britain, 63; The New London Pharmacopœia, 63; Physician and patient: or a practical view of the mutual duties, relations, and interests of the medical profession and the community. By Worthington Hooker, M.D., 132; Surgical anatomy. Fasc. IX. By Joseph Maclise, Esq., 133; Pathology of the human eye. Fasc. VII. By John Dalrymple, F.R.S., 133; A practical treatise on the management of diseases of the heart, and of aortic aneurism, with especial reference to the treatment of those diseases in India. By Norman Chevers, M.D., 177; The histories of the Colleges of Physicians and Surgeons, and of the Apothecaries' Company, &c. By Edwards Crisp, M.D., 178; The reciprocal agencies of mind and matter: and on insanity. Being the Lumleian Lectures, delivered at the Royal College of Physicians, A.D. 1851. By J. C. Badeley, M.D., Cantab, 178; Was the Roman army provided with any medical officers? By J. Y. Simpson, M.D., F.R.S., 178; Clinical observations on diseases of the genito-urinary organs. Part I.—Gonorrhœa and its consequences. By Henry James Johnson, Esq., 204; The anatomy and diseases of the prostate gland. By J. Adams, Esq., 230; Memorials of James Mackness, Esq., M.D., 230; The sixteenth annual report of the Medical Benevolent Fund for the year 1850-51, 230; On gout: its history, its causes, and its cure. By William Gairdner, M.D. Second edition, 272, 557; A history of epidemic pestilences. By Edward Bascome, M.D., 320; Report of the Alleged Lunatic's Friend Society; Summary of suggestions for additions to the law of lunacy, 321; Homœopathy: report of speeches on irregular practice, delivered at the nineteenth anniversary of the Provincial Medical and Surgical Association, 321; The prevention and cure of many chronic diseases by movements: an exposition of the principles and practice in these movements, for the correction of the tendencies to disease in infancy, childhood, and youth, and for the cure of many morbid affections of adults. By M. Roth, M.D., 375; Translation of the Pharmacopœia of the Royal College of Physicians of London. By Richard Phillips, F.R.C.S.L., 392; The Journal of Psychological medicine and mental pathology. No. XVI. Oct. 1851. Edited by Forbes Winslow, M.D., 417; Lectures on the principles and practice of surgery. By Bransby B. Cooper, F.R.S., Senior Surgeon to Guy's Hospital, 417; Manual of human physiology for students: being a condensation of the subject, a conservation of the matter, and a record of facts and principles up to the present day. To each subject are appended, in notes, summaries, in rhyme, of the composition of the fluids and solids, &c. By John Morford Cottle, Licentiate of the Royal College of Physicians, &c., 417; The microscope as a means of diagnosis. By J. Hughes Bennett, M.D., F.R.C.S.E., 462; On improving the condition of the insane. By Henry Monro, M.B., 463; An introductory address delivered at King's College, London, on occasion of the opening of the twentieth session of the medical department. By William Bowman, F.R.S., 463; Report of the proceedings of the Pathological Society of London, 463; The spine: its curvatures and other diseases: their symptoms, treatment, and cure. To which are added some remarks on paralysis. By Chas. Verral, M.R.C.S., &c., 440; Suggestions for the extension and perfection of vaccination, simultaneously with the systematic study of epidemic and endemic disease in India. By J. R. Bedford, Esq., 443; Observations on the diseases of the rectum. By T. B. Curling, Esq., F.R.S., 443; A practical treatise on the diseases and injuries of the urinary bladder, the prostate gland, and the Urethra. By S. D. Gross, M.D., Louisville, 443; The pocket formulary: a synopsis of the British and foreign pharmacopœias, comprising standard and approved formulæ for the preparations and compounds employed in medical practice. By Henry Beasley; An epitome of the London, Edinburgh, and Dublin Pharmacopœias. By W. Culverwell, L.S.A., 488; Observations on the treatment of cleft palate by mechanical means. By John Mapleson, dentist, 488; A translation of the new London Pharmacopœia, including the New Dublin and Edinburgh Pharmacopœias, with a full account of the chemical and medicinal properties of their contents. By J. Birkbeck Nevins, M.D., &c., 531; Remarks on the plea of insanity, and on the management of criminal lunatics. By William Wood, M.D., 583; Comments on convulsive diseases. By C. B. Radcliffe, M.D., 583; An inquiry into the proper classification and treatment of criminal lunatics. By J. C. Bucknil, M.B., 604; The physicians', surgeons', and general practitioners' visiting list, diary, almanack, and book of engagements for the year 1852, 605
